WORK EXPERIENCE

SDE - I
AgroStar

06/2019 – Present   *Pune, India*

Achievements/Tasks

- Worked in Sales Platform for customer acquisition and customer retention that includes referral campaign along with customer relationship management, customer referral logics and integrated e-commerce platform.
- Made a broadcast communication tool that is used for sending upfront messages to the CSR for business driven marketing with acknowledgement.
- Made a dialer middleware tool that routes the calls based on the weighted probability of the call source and state along with the business skill priority that can be dynamically changed.

Intern
AgroStar

06/2018 – 01/2019   *Pune, India*

Achievements/Tasks

- Designed and implemented Galaxy, a B2B sales platform that includes customer/vendor onboarding with segregation based on Institution, partner and branch level. User can place order manually or in bulk by just uploading the data and track order status on the dashboard by applying various business skill filters along with realtime hierarchical representation of revenue.

PERSONAL PROJECTS

Online Messenger
- A web application for sending messages.

Spam detection using laplace smoothening and bayes rule.
- An application that is used to detect a spam email based on a spam data set.
